

Richly Cultivated the STSP

Focus on the
Great Year of

2008

Time flies. The STSP has successfully conquered challenges and obstacles throughout the past decade of hard work. The STSP has achieved much with steady and speedy development. Numerous projects were completed in 2008, laying a solid foundation for future development. The STSP was acknowledged for its outstanding performance and recognized with numerous awards.

The Impressive New Landmark~

The 4th Elevated Water Tank and Distribution Reservoir at the West Entrance of TSP Completed

The construction of the fourth 3,000-ton elevated water tank and distribution reservoir was completed in August 2008. The water tank supplies water to Park enterprises in the Phase II site of TSP. The new landmark stands at the Park's west entrance and is a visual representation of wealth, as in "Yuanbao."

Convenient Accessibility~

KSP Expressway Interchange to National Highway No.1 Completed and in Service

The construction of the 4-kilometer expressway interchange connects KSP to National Highway No.1 includes two phases, road and overpass, with each phase commissioned with separate proposal. The construction began simultaneously in 2005, and the interchange was completed and in service as of March 2009. The improved road infrastructure provides a fast and convenient accessibility to KSP. Ease of accessibility will facilitate further technological development in southern Taiwan.
