## Prospects in 2011

### A Continued Construction of Industrial Cluster Continue to Promote the Biomedical Device Development Plan in Southern Taiwan

To implement the development of the biomedical device industry in southern Taiwan through the 25 approved enterprises at Kaohsiung Science Park; at least 50 basic technicians and 7 professional employees could be cultivated; to assist the enterprises in product research and development, and help with the industrial upgrading and transformation in southern Taiwan.

Anticipation of adding 13 additional investments in the field of biomedical device enterprises. Among them, more than 4 will be the potential enterprises of STSP, and produce 15 related patents.

### Promote the Low Carbon Emission Industrial Clusters in Southern Taiwan

Set up an office to promote the "Low Carbon Emission Development Plan in Southern Taiwan" policy. With the main strategies to promote low carbon energy industries, such as solar cell industry, and energy saving and carbon emission reduction industries, such as LED industry etc., in order to attract relevant clusters and establish an accreditation mechanism for low carbon emission products.

### Promote A Sustainable Green Park

Promote continuously the green system include the green industry, green traffic, green building, and green production, and become the first Science Park in Taiwan certified by EEWH-EC (Eco-Community).

### Public Art and Culture Heritag

Continuously promote the public art activities at Tainan Science Park, installing more public artwork, and inviting the STSP employees and local residents to experience the different spirit in art and culture; Kaohsiung Science Park will also plan the overall view of public art to achieve the target of technology with art.

In terms of archeological sites, will completely unearthed work at the Wangang South Site and do the archeological activities to the students and general public in order to build STSP into a combination of technology and culture.

▼ Solar Power Generation

▼ Special Exhibition on Green Energy and Environmental Protection during Labor Safety and Environmental Protection Month (September 11, 2010)

▼ Free and Convenient Shuttle Bus at the Tainan Science Park (February 9, 2010)
