

Starting from the sugarcane fields in its initial stages, the STSP has, over the past decade, continuously generated historically high profits and employed greater numbers of personnel, shining like an uncut gem to all corners of the world.

In our next phase, we are determined to add elements of innovation and startups to our "industrial clusters," bringing in more business opportunities; to transform our "sustainable Science Park" into a more LOHAS-oriented and greener eco-community; and to continuously introduce "art and culture" to every corner of Tainan Science Park (TSP) and Kaohsiung Science Park (KSP), allowing everyone to have more opportunities to get closer to art.

Additionally, we will work closely with Hsinchu Science Park and Central Taiwan Science Park to usher in greater prosperity for Taiwan's high-tech industry.

We would also like to thank all Park enterprises and employees for their support, and at the STSPB, we will continue serving you. Let us work together for a better future.

Southern Taiwan Science Park Bureau of Ministry of Science and Technology

Director-general of the STSPB

*Lin Weicheng*
