

■ Recognizable and Systemized Road Guidance System at the STSP

■ More Friendly Barrier Free Environment at the STSP

The Hierarchical Guidance System

On September 17, the improvement construction of guidance system was completed at the STSP. The hierarchical guidance system was established for the signage. The names of important sites and scenic spots as well as traffic sign information were integrated to provide users the guidance system at the STSP with better recognizable, characteristic, and bilingual road signs.

Outstanding Award of Barrier-Free Friendly Environment

With the continuous promotion and improvement of barrier-free friendly environment, the STSP on November 28 was awarded for its outstanding performance under the supervision of barrier-free access in public buildings by the Construction and Planning Agency of Ministry of the Interior.

Appearance Rebuilding of High-Rising Water Tank

With the installation of "Taiwan Blue Maggie," the high-rising water tank adjacent to Provincial Highway No.1 at the KSP was rebuilt into a landmark. The upward ring-shaped ribbon revolving around the water tank symbolizes the continuous innovation of technology. The bird shape takes the meaning that the STSP is an ideal place offering the good investment environment and conditions to attract the presence of good enterprises.

A New Garden and Square

The square in front of the Administration Building at the TSP had originally been installed with beautiful public artworks including Four Season, Tree Ring, and Blackie, and in the end of 2014, the plantation project began here by planting the grass on the slope and dozens of trees for the shielding purpose. In addition, benches were equipped here to provide visitors with both leisure and business a site to relax.
