

Positioning for the Future, the Vision of the STSP

Continuous Enhancement of Industrial Cluster and Promotion of Innovative Development at the STSP

The STSP is devoted to the provision of exceptional investment environment, the enhancement of the industrial clusters of biotechnology, medical device, green energy and low carbon emission, the construction of creative and entrepreneurship platform, and the improvement of business and industrial services at the STSP.

Promotion of the Goal to Build a Sustainable Science Park into an Ecological Community

By constructing a friendly and resource recyclable environment and promoting health and nontoxic local food ingredients, an ecological system integrating life is developed.

Promotion of Comprehensive Cultural and Artistic Life

By promoting public art and cultural preservation, the STSP will become a Science Park that is closely linked to production, life, and ecology as well as become the model Science Park integrated with technological innovation and culture.
