Green Project at the Growth Stage

The NNKIEH's Green Project entered its third year at the "growth stage." In 2015, coordinating with the Foresight Project and Campus Aesthetics Environment Rebuilding Project, continuous focuses were placed on caring for ecological environment and promotion of green technology education. Promotion achievements have gradually been recognized by schools around Taiwan. Many came to visit the NNKIEH campus with the accumulated number of visitor reaching 2,500.

Foresight Project

Since School Year 2012, the NNKIEH cooperated with Kaohsiung Municipal Senior High School and National Taitung Girls' Senior High School to apply for the integrated project. I-Shou University was invited to be the Co-Principal Investigator to develop highlighted curriculums. Until School Year 2014, three set of mature module courses were developed to benefit teachers and students. The results were presented to 13 high schools and vocational high schools around Taiwan.

▲ Winning Award of Excellence, the Golden Prize, and Silver Prize for Result Presentation of 2015 Foresight Project Researches

▲ The First Place Prize of the 53th National Science Fair

▲ Participation of Elementary Department in the Final Round of National Music Contest (March 12, 2015)

Cultivating the Versatile Talent with Outstanding Performance

In 2015, NNKIEH students demonstrated outstanding interdisciplinary performance and received awards in both domestic and international contests. In terms of music skills, the Chorus of the Junior High and Elementary Departments were awarded with the Outstanding Honor of Group B; for scientific contests, the Senior High Department was awarded with the Second Prize of Botany and the Third Prize of Math in the 2015 Taiwan International Science Fair. In the 2015 International Youth Invention Exhibition, the NNKIEH respectively received Golden, Silver, and Bronze Awards. The Second Prize of Math was given to the Junior High Department in the 55th Junior High School Science Fair.
