Green Achievements

The STSPB continuously gave guidance and consultation for applications of green building and cleaner production certification. By the end of 2015, there were 11 certified diamond-level green buildings, 11 factories obtaining Green Factory Label, 12 production processes certified with Cleaner Production. The STSP is the highest certified science park in Taiwan with Green Building, Green Factory Label, and Cleaner Production.

Waste Water Treatment Plant at the KSP, Certified Environmental Education Facility

On March 16, the Waste Water Treatment Plant at the KSP was certified as environmental education facility where provides multiple sets of teaching courses to enable trainees to understand the mutual existence concept with natural environment and promote and implement the concept in daily life. With this awareness, the public is able to reflect and continuously makes contribution to environmental protection.

Certified Environmental Education Facilities at the TSP by the EPA

The STSP has rich natural ecological resources, historical monuments, art culture, and sound environmental protection facilities. In the STSP, Environmental Protection Center, Xiake Lake, ecological conservation area, Resource Recycling Center, Emergency Response Center, Archaeological Artifacts Exhibition Room, and Xingangshe Culture Center are all featured environmental education facilities within the TSP. At the initial stage, the STSPB applied for environmental education facility certification for the Environmental Protection Center and Resource Recycling Center. On December 21, both were officially certified. In the future, courses on natural conservation, water environmental ecology, and cultural conservation will be gradually developed.

Certified “Silver” Enterprises Environmental Protection Award of the Resource Recycling Center by the EPA

After recognized by Ministry of Economic Affairs (MOEA) with “Outstanding Award of Energy Conservation” in 2013, the Resource Recycling Center on November 4 won “the 24th ROC Enterprises Environmental Protection Silver Award” given by the Environmental Protection Administration (EPA), the first winning science park in Taiwan. The STSP was also the first winner among waste treatment institutes in industrial parks. The honor was the other recognition to the Resource Recycling Center as well as a big encouragement for environmental protection promoted by the STSP.

ISO 14001 Sustainability Award Won by the Environmental Protection Center

The Environmental Protection Center at the TSP was certified with ISO 14001 Environmental Management System in August, 2001. In pursuit of concepts including “legal compliance, pollution prevention, continuous improvement, and comprehensive promotion,” the Environmental Protection Center implemented overall environmental policies. It passed re-examination and external audit of ISO 14001. At the 15th anniversary of certification, the Environmental Protection Center on October 1 received ISO 14001 Sustainability Award.
