

> The Establishment of the STSP Procurement Committee (May 26)

Diversified and Innovative Business Services

The rapid growth in the business of the STSP enterprises lies in their quality services. Even though the rapid growing number of turnover has proved the development of the STSP and its quality services, the Administration is committed to create more innovative business services by working with the Association of Industries in Science Park to host various activities.

The Administration worked with the Association of Industries in Science Park to establish the "STSP Procurement Committee" on May 26, 2004 in order to create a common exchange platform for the procurement, logistics, and distribution management for the STSP enterprises, aiming to lower the operation costs of the STSP enterprises and enhance the STSP international competitiveness.

The Administration shares various channels of communication with the STSP enterprises. The Administration also engages in communication with the specialized committees of the Association of Industries in Science Park and in regular and irregular intervals. On September 24, 2004, the Administration even invited the specialized committees of the Association of Industries in Science Park, and business partners of the STSP, such as Taiwan Power Company and some banks, to attend a business liaison administrative meeting in Nan Yuan Resort Farm in Tainan County. A good partnership was then established with 60 participants from the business partners.

> Award Ceremony for Outstanding Bonded Business Personnel (November 9)

To reward the bonded business personnel and facilitate the exchange of personnel from the STSP enterprises, the Administration held a ceremony to award bonded business personnel on November 9, 2004. 20 staffs received the award.

Moreover, the Administration aimed to facilitate the liaison between the industry, government, and academia in Tainan as well as the high level managers of the STSP enterprises in order to drive the further development of the STSP. To this end, the Administration hosted the "The Elite Gathering in Winter - Technology, Human, and New Future of 2004" at the Small and Medium Enterprise (SME) Incubator at Tainan Science Park on December 17, 2004. Mr. Hsin-I Lin, the former Vice Premier of the Executive Yuan, ITRI Chairman, the Senior Advisor to the President, the convener of the Economic Advisers Group to the President, was invited to give a keynote speech on "Innovation and Competitiveness."
